

QuickGuide for Computer Science - Mathematics

The goal of this interdepartmental major is to provide substantial background in each of these two disciplines, focusing on some of the parts of each which are closest to the other. Students intending to pursue a PhD program in either discipline are urged to take additional courses, in consultation with their advisors.

The program requires a total of at least 46 points: 20 points in Computer Science, 21 points in Mathematics, and two 3-point electives in either CS or Maths.
